

RUSU Progress Tracker Policy

I want us to implement a policy progress tracker for the Full-Time Officers to help us increase accountability as a Union. This would feature a progress bar for each of the policies that our officers have proposed and how they are doing in light of their initial propositions, in a similar fashion to the trackers implemented by Universities such as Exeter.

While we do already have platforms to hold our officers to account, there is very little that we have online to monitor the work of our officers remotely. I want to make sure that everything is done to implement policies on the manifestos of our Officers.

Policy expires: March 2019
